Impact Report

JANUARY-MARCH 2024

Dear Friends,

We would like to take this opportunity to share with you some highlights of the work we at Nova Ukraine have been doing lately to aid Ukraine and its people during this devastating war. We're committed to our mission of building resilience and providing help to Ukrainian people, and your support is making it possible.

As we are scaling up our assistance to Ukraine's hospitals and stabilization centers, we took two significant steps forward in the Healthcare sector: the signing of a Memorandum with the Ministry of Health of Ukraine as well joining as a partner and active member of the cluster of World Health Organizations.

By strengthening healthcare facilities and services, we're improving access to healthcare for people in Ukraine at this critical time. Since the end of 2023, cities like Kharkiv, Odesa, Kyiv, Dnipro, Sumy, and Kryvyi Rih have been heavily affected by shelling and attacks on civilian infrastructure. In response, we've been setting up shelters and facilities to provide people with a safe place to stay and access to essential services. These projects are not only providing immediate assistance but also offering hope and reassurance to those who have been impacted by the violence.

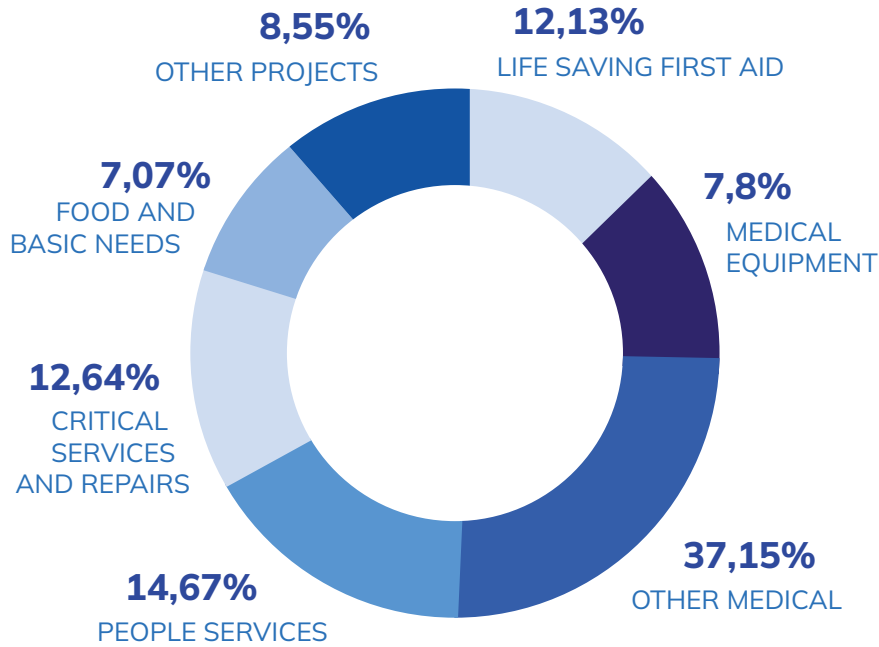

With this, we would like to express our heartfelt gratitude for your continued support. Your generosity and compassion are making a real difference in the lives of people in Ukraine, especially among vulnerable populations like children, wounded, and internally displaced persons.

Thank you for your ongoing commitment to our cause and for standing with us as we work to uplift and empower the people of Ukraine during these challenging times.

Warm regards,
[Board of Directors]

JANUARY – MARCH 2024

PROJECT SPEND:
\$ 6,369,000+

TOTAL AID DELIVERED

TOTAL COLLECTED:

\$119,924,476+

\$88,133,333+ financial gifts

+ **\$31,791,143+** in-kind donations*

NUMBER OF DONATIONS: **220,841+**

TOTAL AID DELIVERED:

\$97,549,847

*In-kind donations — includes goods donated directly to Nova Ukraine, as well as donations to third-parties that Nova Ukraine helped transport.

Meals served

3,089,478

Weight of goods delivered on trucks (kg)

22,431,123

Evacuations (people, animals)

158,854

Med packs distributed

\$797,654

Number of volunteers

3,517

Number of people who received help

5,344,508

ELIMINATING NEED GAPS IN THE MEDICAL SYSTEM

In response to the overwhelming needs of Ukrainian hospitals, Nova Ukraine formed a dedicated Medical Team in March 2022 to do what was needed. The team was tasked with sourcing and distributing life-saving medications, wound care supplies, diagnostic equipment, and special orthopedic devices to treat complex open fractures resulting from shrapnel wounds.

TO DATE, WE HAVE DELIVERED SIGNIFICANT LEVELS OF SUPPLIES*

* As of February 29, 2024

Diagnostic Equipment

- 98** Ultrasound portable machines
- 40** Portable X-RAYS
- 8** X-rite densitometers
- 3** Laboratory centrifuges
- 1** Urological system
- 1** Laboratory refrigerator
- 1** Ultrasound machine Hewlett Packard
- 1** Ophthalmic microscope
- 5** Others

Rehabilitation Equipment

- 3** Bicycle trainer for legs
- 2** Hydraulic patient lifts
- 1** Rehabilitation system Glorhea Aria
- 1** Rehabilitation system Motomed
- 1** Rehabilitation system LUNA EMG
- 1** Sling for patient lift

Rehabilitation Beds, Stretchers

- 757** Rehabilitation beds (Evolution and Avantguard)
- 17** Stretchers
- 120** Mechanical beds

Neonatal Equipment

- 99** Incubators
- 63** Open and transformers
- 44** Ventilators
- 34** UV lamps and Fetal monitors
- 38** Bili-Lights
- 8** Nebulizers
- 3** Cryosurgical gynecological systems
- 1** Transport incubation system
- 1** Open resuscitation system
- 2** Others

Delivery Beds, Stretchers

- 92** Delivery beds (Affinity 4)
- 3** Delivery Stretchers
- 9** Others

ICU Equipment

- 22** Ventilators
- 7** CPAP/BPAP devices
- 5** Bipap Respironics
- 3** Oxygen concentrators
- 1** LP-10 Volume Ventilator
- 7** Others

ICU Beds, Stretchers

- 736** ICU beds (Different types)
- 23** Child cots
- 277** Mechanical beds
- 15** Stretchers
- 21** Different medical furniture

Surgery Equipment

- 115** Operating room tables
- 95** LED lights
- 33** Ventilators
- 46** Coagulators
- 5000+** Osteosynthesis plates
- 2** Anesthesia and breathing apparatus
- 2** Infusion Pump
- 1** Surgery system ENT
- 1** Patient monitor with accessories
- 7** Others

However, as the War Continues, More and More Medical Equipment Is Urgently Needed.

Between January and March 2024, Nova Ukraine and our partners saved many lives throughout Ukraine with the delivery of:

5 medical ventilators to the Mykolaiv and Kharkiv regions with **4UA RATEG**.

[Read more](#)

3 portable X-ray devices to the Kherson region for examination of patients with limited mobility. They are vital for promptly identifying and addressing critical, life-threatening conditions like collapsed lungs, spine fractures, and complex bone fractures. This equipment is essential during the initial assessment of wounded individuals, enabling doctors to rapidly identify injuries and provide timely stabilization to prevent further deterioration.

19 portable ultrasound systems (Sonoscanner, Orcheo, U-lite types). They are critical in trauma evaluation and resuscitation, facilitating swift diagnosis of internal bleeding in wounded patients. Also, portable ultrasound machines are utilized in intensive care units, rehabilitation treatment centers, prenatal care clinics, and in various other medical settings.

[Read more](#)

38 osteosynthesis plates (locking plates to hold bone fragments in place) for reconstructive surgery on the spine, upper and lower limbs, and the face. They are also used to treat open compound fractures and extensive soft tissue damage that poses a high risk of infection.

[Read more](#)

74 packages of the chemo medicine Tyverb, which will support 25 women for 1.5 months in the fight against breast cancer. The project is implemented in collaboration with **Athena Women Against Cancer**.

In cooperation with our partner **Patients of Ukraine** as part of the Humanitarian Hub Initiative, we fulfilled:

74 hospital requests for medical equipment and supplies

20 hospital requests for life saving medications

7 requests to provide emergency supplies to medical evacuation teams and emergency first aid stations

Additional Partnerships to Increase Medical Aid Were Initiated as Follows:

- **Nova Ukraine** signed a two-year Memorandum of Cooperation with **the Ministry of Health of Ukraine**. The memorandum outlines several key cooperation areas, including providing medical equipment, prosthetics, and medications for healthcare facilities. There will also be partnerships to create and maintain rehabilitation programs and provide training in tactical medicine.

[Read more](#)

- **Nova Ukraine** became a partner and active member of the cluster of **World Health Organizations**.
- In a new partnership with **EBRD Community Initiative**, Nova Ukraine provided the Luna EMG for upper and lower extremity rehabilitation.

TAC MED

Saving Lives in the Field

Tactical medicine is essential in sustaining life the moment an injury occurs.

As part of this life saving initiative, we are grateful to be working with our partner, **Serhiy Prytula Charity Foundation**, and their Civilian Preparedness Center Project.

Using tourniquets and other supplies provided by Nova Ukraine's TacMed teams, civilians living in frontline areas are trained in applying immediate, life-saving first aid.

Between January and February 2024, our Tacmed Team Processed 39 Complex Requests and Delivered Aid, Including:

1,310
First aid kits

41
Backpacks for paramedics

5,390
Tourniquets

UKRAINE'S INFRASTRUCTURE IS UNDER CONSTANT ATTACK

Nova Ukraine's Infrastructure and Energy team works with partners to address situational challenges (e.g., damages to critical infrastructure from Russian shelling) and provide systemic solutions (e.g., alternative energy development for that infrastructure and educational institutions). Some examples of our work include:

Surviving the Cold

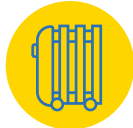

Sadly, in many parts of Ukraine, it is not uncommon for the infrastructure to be damaged, leaving citizens to wake up in frigid homes without heat or hot water to boil a simple cup of tea. For these most vulnerable Ukrainians, our team has sent a range of essential supplies:

35 stationary stoves for cooking (Kharkiv).

[Read more](#)

50 gas heaters and cylinders (Kherson region).

[Read more](#)

600+ portable gas cylinders and stoves (Donetsk, Zaporizhzhia, Kherson, Kharkiv regions)

[Read more](#)

350+ rocket stoves (Kherson and Mykolaiv regions)

[Read more](#)

Establishing Points of Invincibility: Warming Centers for Vulnerable Ukrainians

From October 2023 to April 2024, this Nova Ukraine project has been operating in partnership with **the Howard G. Buffett Foundation and Ukrainian Railways (Ukrzaliznytsia).**

We have established 111 Points of Invincibility (96 on the railway stations throughout Ukraine and 15 in the spaces of other Nova Ukraine partners). All Points are available free of charge to passengers traveling by train and to city residents who find themselves in a critical situation due to the shelling and its consequential damages. In these Points, people feel safe and warm. There are charging stations and WI-FI for communication and interactive games to pass the time while waiting for a train. For passengers with children, we have family spaces where children can find gaming activities or spend quiet time, such as coloring or reading a book from our project library.

More than 1,300,000 people used the stations' services from October 2023 to February 2024.

[Read more](#)

Restoring Livable Conditions at Home

Whether a home has been shelled to pieces or rendered unlivable, innocent people are often left homeless, forced to seek shelter. To help with restoration, Nova Ukraine has supplied our **Swedish partners** with all the tools and building materials necessary for rapid response in clearing rubble after shelling and eliminating the consequences of russian attacks. These three Swedish Rapid Response Mobile teams have received approval from the Military Administration and the Department of Emergency Situations to ensure the restoration is as safe and efficient as possible.

[Read more](#)

Addressing the Consequences of Shelling

This area of work is a continuation of the previous one, financing our partners to enable people to stay in their homes even after intense shelling or blast waves. In Q1 of 2024, we helped **1000+ people** whose premises were damaged by shelling.

[Read more](#)

Maintaining the Water Supply

Ukrainians will be dealing with the consequences of the russian attack on the Kakhovka Dam for years to come. One of the worst consequences is the lack of potable water for drinking and eating. A fairly simple solution could be the installation of water treatment plants. At the beginning of 2024, one new station was built in a village in the Kherson region, giving 500+ residents free access to clean water.

Restoring Energy

Simple daily tasks like cooking, doing laundry, bathing, and keeping gadgets charged become erratic or impossible when critical infrastructure is targeted. But there are many more dire consequences as well.

For example, a small district hospital in the Kropyvnytskyi region that serves about 3,000 patients, more than half of whom are extremely vulnerable, disabled, or elderly, had no alternative power sources to sustain life during blackouts. Nova Ukraine's partners delivered 5 ECOFLOWS to this hospital to keep patients connected to lifesaving support.

Another example is the transfer of four large generators of varying capacities (from 7.5 kW to 20 kW) **to the Chornomorsk community**. This equipment ensures that even during shelling, the important points of infrastructure will have water, electricity, and full capacity for communications.

Creating New, Much-Needed Community Spaces

After months of Russian occupation, a kindergarten in the Kyiv region received a chance to restore what was lost. Nova Ukraine rebuilt and refurbished the space so 250 children could safely and comfortably continue to play and shelter there during air raids.

Similarly, Nova Ukraine helped our partner, **Territory Of Good Podillya**, open a multifunctional space in Khmelnytskyi to serve 1500+ people every month. This space serves as a shelter, a point of resilience, a youth space, a counseling center for IDPs and others in vulnerable categories, and a place of replenishment (where you can wash clothes, shower, and receive medical and/or psychological support).

In January-March 2024, Nova Ukraine partnered with **CF Rada Mist** to install 6 modular shelters that protect civilians from Russian shelling, shock waves, and falling debris. These shelters were built using Israeli technology and can accommodate up to 20 people at a time.

[Read more](#)

Our partner, **“Know to Live,”** has created a place in the Vinnytsia region where a social service center, or Point of Resilience, now operates. Here, IDPs and people from other vulnerable categories can take a shower, get a haircut, do laundry, consult with a doctor or psychologist, and feel human again.

[Read more](#)

LIFTING PEOPLE UP

The work of Nova Ukraine and our partners is focused on meeting basic and critical needs. But sometimes, our efforts are about restoring something less tangible, less visible but just as important. Returning a sense of dignity, a shred of hope, a reminder that Ukraine is still home, no matter where you are and despite all that's been taken from you.

Making Shelters Feel Like Home

Our partners, **CF GHOST**, oversee three family-type orphanages. When 32 children and their parents left the Luhansk region to start a life in a new city, they left the happy childhoods they had known. Yet, these incredible children have somehow maintained the optimism of youth despite all they've seen. Their smiles are especially heart-warming when opening gifts like warm clothes and bedding, soccer balls, coloring books, and some practical gifts like generators, vacuum cleaners, dishes, and dryers to make the orphanages feel cozy, clean, familiar, and safe.

Keeping People from Freezing

Once infrastructure has been attacked, people near the frontlines find themselves facing frigid conditions. Without heaters or stoves, surviving even one night is a terrifying prospect.

Nova Ukraine has stepped up **by providing 9,000 sets of thermal underwear** for the most vulnerable populations, including IDPs, people with disabilities, the sick, and the elderly.

We also delivered 63,000 chemical heating pads to warm the feet, hands, and bodies of these residents, those in de-occupied regions, medical workers, and the injured people they care for.

Rebuilding Lives: One Brick at a Time

The story of each Ukrainian's experience of war is unique. While some were forced to flee, taking only family and pets, others remained and lost everything the instant the russians shelled their city. But their resilience is unbroken, and every Ukrainian is willing to start over. Nova Ukraine is providing decent living conditions by gifting:

- 🟡 2,000 warm sleeping bags
- 🟡 2,300 blankets
- 🟡 5,000+ sets of bed linen
- 🟡 500+ mattresses
- 🟡 800+ pillows

It is our hope that these comforting necessities will help kick start new lives.

Fitting the Wounded with Adaptive Pajamas

Special pajamas are required for those whose injuries are checked daily. Nova Ukraine has **delivered 1,800 sets of these adaptive garments to hospitals**. Designed with velcro for added convenience and access to injuries, these garments reduce the disturbance to other parts of the anatomy during required procedures or the dressing of wounds. This makes patients more comfortable while actually shortening recovery time.

SMALL GRANTS – BIG PROJECTS

One of the most vital areas of our assistance is the support of small businesses, to which we provide grants. Our partner teams put donated funds to great use through various means to stabilize the local economy.

Securing Unique Places for Kids with Special Needs

With our support, our partner, **Start with Yourself**, has opened a specialized new children's center in Kyiv Oblast. Organizers have worked with children with disabilities since 2015. Their expertise has given 100 kids with special needs a welcoming space made just for them. In addition to recreational spaces, there are rooms for art therapy, sensory rooms, psychological counseling, and even a small cinema. The center is staffed with qualified, dedicated professionals from various fields who help these little ones learn, socialize, adapt, and participate in life before ultimately contributing to Ukraine's future.

[See more](#)

Ensuring Christmas for our Children

Our manufacturing partners turned into holiday elves to produce **10,000 New Year's sets for Ukraine's children** of war. The businesses worked tirelessly to prepare delicious gingerbread, sweet candies, lollipops, etc. After the treats were made, 16 partners, like Santa, delivered them throughout Ukraine. We are thrilled that this robust network of partners has spread some holiday cheer for so many of our children.

[See more](#)

What Does Bread Smell Like After Months of Occupation?

Bread is an integral part of Ukrainian history and culture. It is a comforting presence for both our greatest joys and our greatest tragedies. For us, bread is life. Our partners who bake and deliver bread to Ukraine's liberated territories tell us that people still dream of fresh bread – they smell it and remember its taste.

Currently, Nova Ukraine supports four partners on an ongoing basis, all of whom are united in the desire to bring bread to thousands of Ukrainians and remind them that Ukraine will heal, the suffering will be behind us, and our homeland will once again be free.

[Read more](#)

EXTENDING THE HUMAN TOUCH

The projects we take on are about reaching into every corner of Ukrainian life and making it better. As long as the war continues, the suffering remains, but so does the hope that others will continue to help Ukraine to forever stand strong.

Five Days that Can Change Lives

For three years now, Nova Ukraine has partnered with **Tour Family Ukraine** non-profit and the **Children of Heroes** Charitable Foundation to provide psychological and emotional support for the families of fallen soldiers and IDPs.

Since January 2024, **65 participants, consisting of 39 kids and 26 guardians, have visited a winter recovery camp** in the Carpathians. Aside from hosting family activities such as hikes in the mountains, artsy workshops, and board game nights, children and their mothers were offered psychological therapy.

[Read more](#)

If You Want a Child to Grow, Give Them a Sense of Security

When children are forced to live in terrible conditions, it is impossible for them to develop as they should. Nova Ukraine and our partners do not forget this. Together, we have provided children and their families with a better environment.

- Nova Ukraine and partners have equipped family-type shelters in the Kharkiv region with beds and comfortable mattresses for 30 children. For 8 of them, who had been evacuated from Avdiivka, Kramatorsk, and Bakhmut, these brand-new beds restore a feeling of safety and sweeter dreams.
- Kharkiv remains under attack. Each day starts and ends with air raid alarms. It is vitally important to create some sense of normalcy. With our help, **The Kharkiv City Charity Foundation Timur** installed a ventilation system in one of the bomb shelters that is used as a theater for entertaining children and bringing their own talents to life. Recently, 100+ people gathered for the famous Ukrainian play Mavka. The sound of children laughing with delight, heard under the threatening alarms above, is both heartbreaking and gratifying.

Evacuating People Out of Danger

Our Evacuation team supports the efforts of trusted partners who safely evacuate people from regions and settlements so dangerous that they cannot attempt to leave on their own. Partners who carry out these evacuations are supported in managing the logistics, vehicle maintenance and repair, and fuel supplies.

Our partners at **BARRIER-FREE FOUNDATION** specialize in evacuating people with disabilities or the seriously ill from dangerous regions. The Foundation has secured agreements with foreign partners who accept these people for accommodation or medical care. Since the beginning of 2024, **they have helped 170 people evacuate** who would have been unable to travel otherwise.

[Read more](#)

Nova Ukraine has also been working with our Czech NGO partner, **Helping to Leave**, to evacuate Ukrainians from temporarily occupied territories. **Our efforts have enabled 94 people, including those with limited mobility**, to find safety away from conflict zones.

These efforts, spanning countries and requiring intricate logistics, underscore our mission's ongoing urgency and complexity.

Helping Refugees in the US (Emergency Housing Team)

Ukrainians who are starting a new life in a completely new country with its own laws, culture, and idiosyncrasies require different kinds of support. Some need housing, some need help finding a job, and some need to find a community in the country that has sheltered them.

Here are some of the incredible things our EH Team has accomplished*:

- Of the 4, 286 refugees we have helped, 503+ have received financial aid.
- We run a shelter in Orange County, California, that has hosted more than 100 Ukrainian refugees from 2022 to date: 30 families, 30 children, 13 single refugees, 3 dogs, and 6 cats.
- We have conducted acculturation webinars for refugees with our partners from Solvera.
- We have transferred donated cars to the refugees.
- We opened applications for Housing Assistance for Ukrainians (HAU), a program of the State of California.
- We enlisted volunteers to help with resumes and job searches.
- We have started a life coaching program for refugees.

*as of March 31, 2024

[Read more](#)

Testing Our Humanity

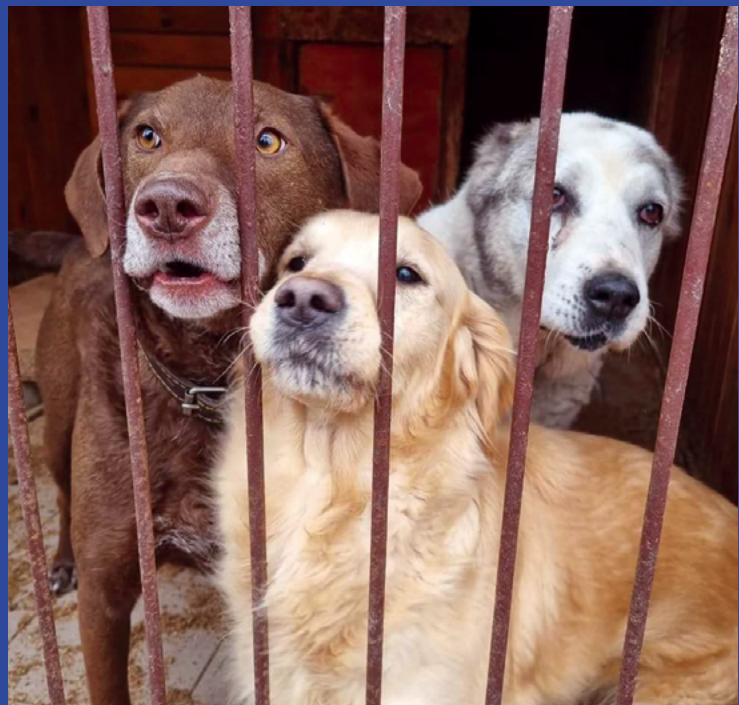

It isn't just people who suffer in war, as our Animal team knows well. Since 2023 alone, Nova Ukraine and our partners **have helped over 35,000 animals** with evacuation, emergency medical care, preventive treatments and vaccinations, and shelter improvements.

One example is our partnership with **IFAW Global**. Together, we built eight large kennels and seven insulated dog houses for the Mala Dziga Shelter in the Kyiv Region. This adoption-focused shelter takes in large-breed dogs that are most commonly forced to be left behind during evacuations, and the hardest to adopt out.

- 🕒 Kennels are modular and can be put up and deconstructed as needed.
- 🕒 Dual-space kennels are especially valuable in improving animal adaptability in a new place.
- 🕒 Dual-space kennels allow easy and safe cleaning, improving animal life quality.

Thanks to this project, **16 dogs at a time are able to have a new and improved quality of life.**

Such initiatives increase the shelter's adoption rate, and therefore drive up turnover, saving more lives.

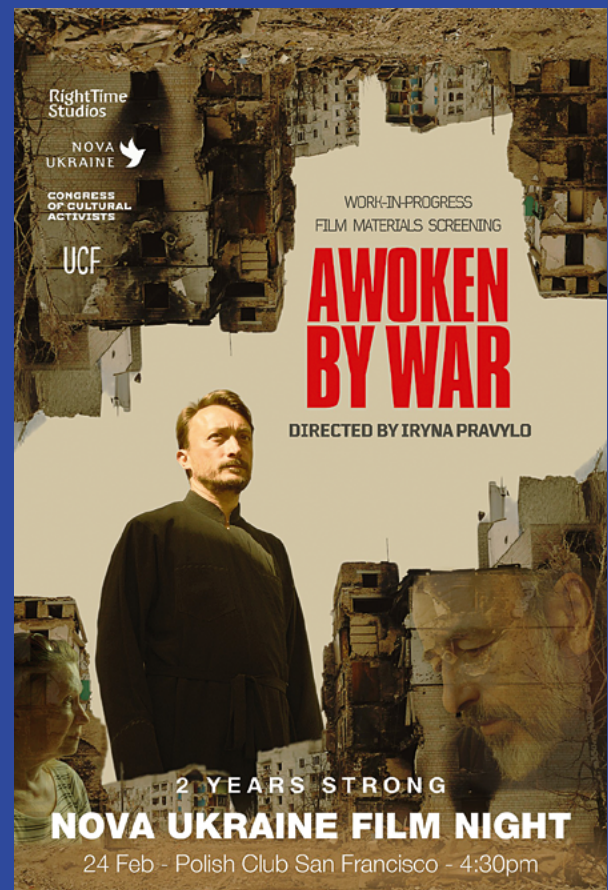

Understanding the Ukrainian Experience

It is impossible to overstate the value of truth when talking about this war. The tools used by the aggressor are based on propaganda and blatantly manipulative rhetoric. Therefore, the counter-narrative from respected Ukrainian figures is critical. That is why the Oscar awarded to the documentary film *20 Days in Mariupol*, directed by Mstyslav Chernov, is so powerful and affirming.

Equally important is the Work In Progress Film – Materials Screening of the Ukrainian independent film *Awoken by War*, directed by Iryna Pravylo. Nova Ukraine was honored to sponsor a screening here in the US. *Awoken by War* is an intimate but searing collective portrait of Ukrainian life after occupation in the Kyiv region (Bucha, Hostomel, Irpin, Borodyanka, etc.).

It is our hope, on behalf of all Ukrainians, that these two films will give you more reasons to keep watching what is going on in the largest military conflict in Europe since WWII. Please do not turn away from Ukraine. Together, we stand.

Halyna Kryloshanska

Thank you so much for creating a documentary where the voices of these heartbreaking tragedies are heard and seen. It is raw and powerful and the world should see it to understand the evilness Ukraine is fighting against.

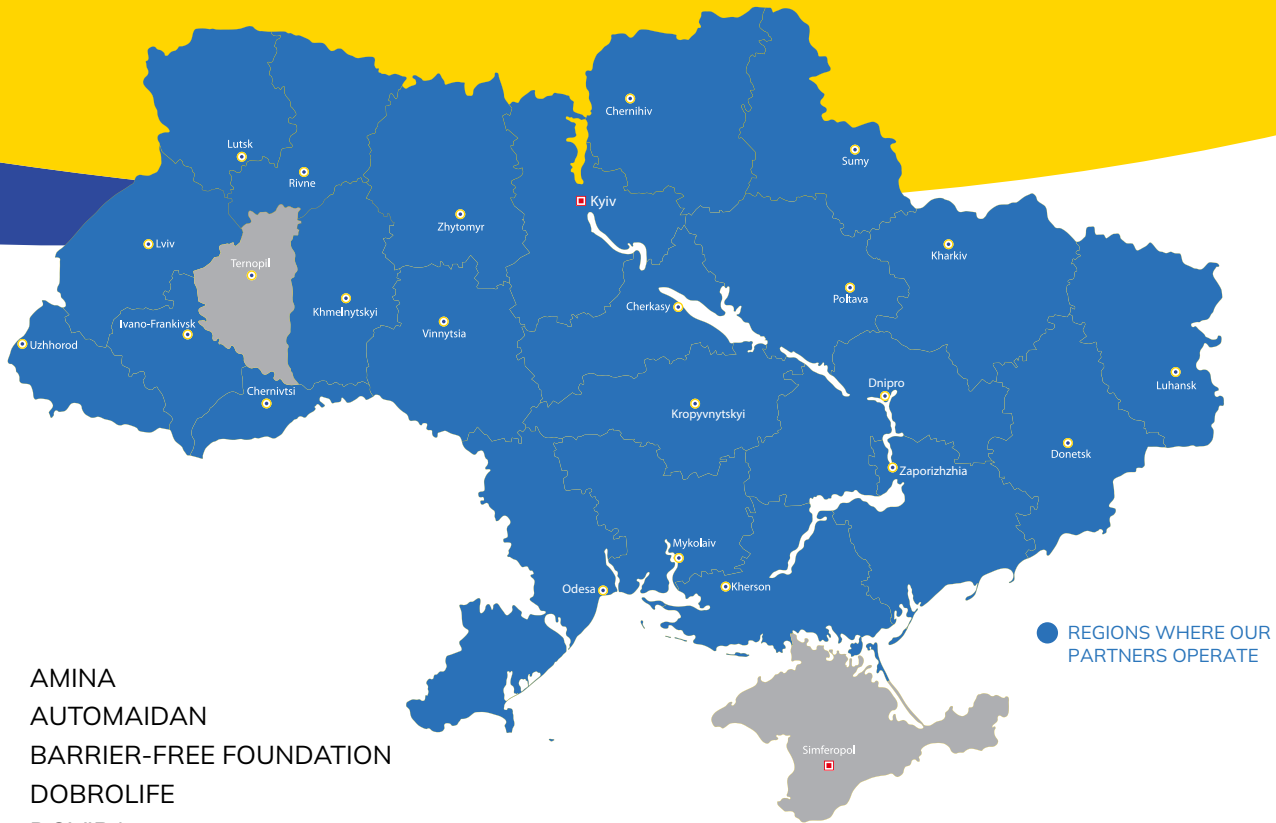

Thank you to the whole team for showing the ugly face of the war, broken destinies and lost lives and encouraging the viewers not to let the world forget that Ukraine is still at war and each day innocent people die.
